
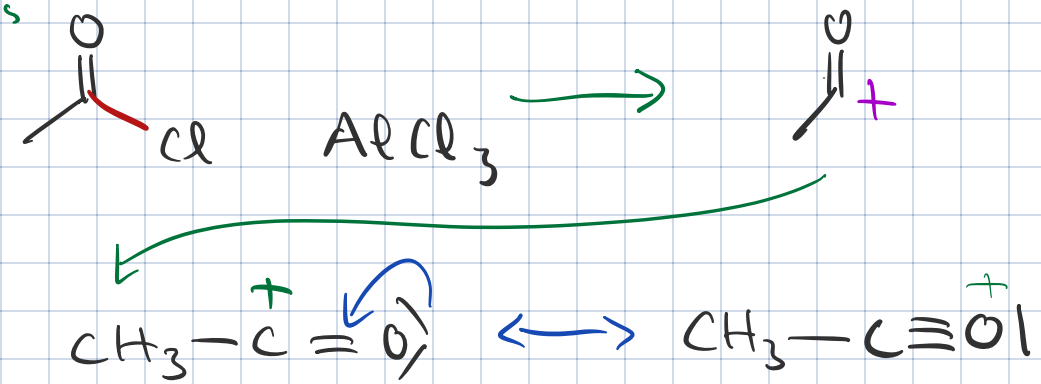
Mech

Friedel Crafts

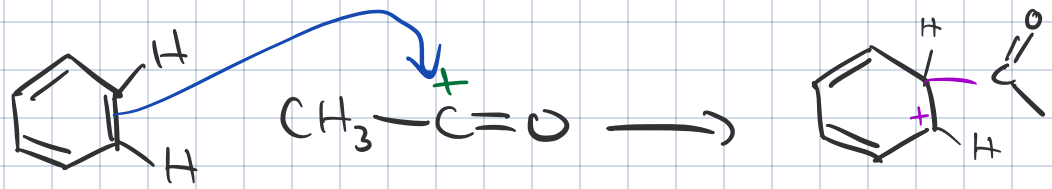
1.

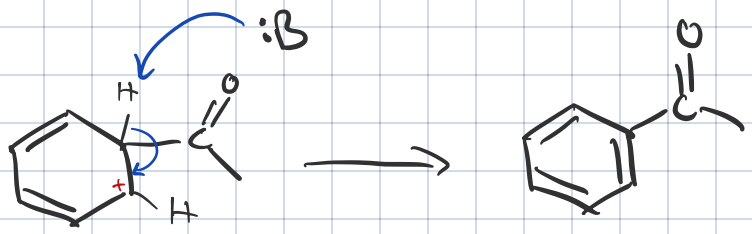
Mech not shown

acylium (resonance, no rearrangements)

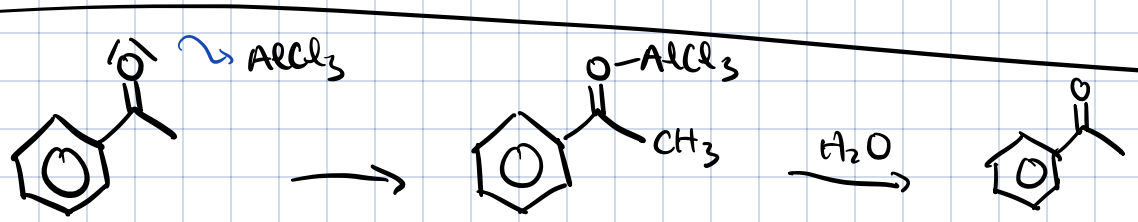


2.



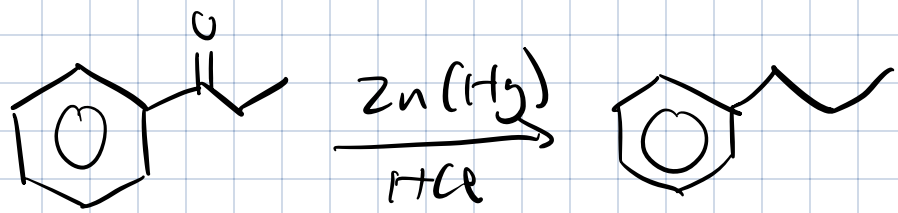


no hydride shift, the + charge is delocalized



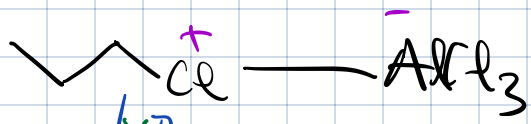
Important!

after acylation, reduction (Clemensen/Wolff-Kisdner) can be used to form propyl benzene



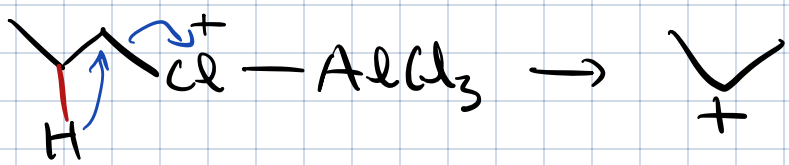
Why not alkylation?

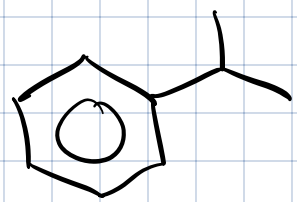
↳ Hydride shifts!



↳ 1° C^+ bad

instead,





so FC Alkylation can only form
